1 Introduction

2 The tiger grammar

You should not write how you extracted the grammar from the appendix.

3 The abstract syntax

Write how the semantics actions are used to construct the AST for the program.

4 Conflict management

How conflicts were detected and what you did to resolve them. If you were unable to remove all conflicts, state why they are benign.

5 Problems encountered & experience gained

If you had any problems in the work process, write it here with what you gained.

6 5 tiger programs

5 interesting tiger programs that you find test your parser in a good way.
